

### CROSS-REFERENCE TO RELATED APPLICATIONS

This application is a continuation of U.S. Reissue Application No. 10/166,190, filed June 11, 2002 and now allowed, which application is a reissue application of U.S. Patent No. 6,253,515.

Kindly delete the first sentence and paragraph of the patent specification (*i.e.*, U.S. Patent No. 6,253,515) which reads: [This application is a continuation-in-part of U.S. application Serial No. 08/603,243 filed February 20, 1996 now abandoned.]

#### In the claims:

Kindly cancel claims 1-9.

Kindly add the following new claim 10:

10. (New) A concrete panel system comprising a plurality of concrete panels arranged in side-by-side fashion on a substantially vertical supporting wall, wherein each of the panels comprises a rectangular body having a front surface and a rear surface and beveled side edges, wherein the side edges of adjacent panels form a V-joint therebetween, wherein the V-joint has its apex at the rear surfaces of the panels upon installation of the panels, and wherein a flexible sealant material is in portions of the V-joint so as to provide a seal between adjacent panels.
